the Safest name in the world **Ah AhnLab**

Lighter but More Powerful

# AhnLab V3 Internet Security 8.0

AhnLab V3 Internet Security is an integrated security solution that protects against the latest security threats. It offers anti-virus and anti-spyware engines as well as network, web, and e-mail security, and PC management. The product has significantly reduced resource usage without sacrificing its integrated security features.

## Features

### Immediate response to security threats

Protects against security threats such as virus, worm, trojan horse, and spyware with the integrated engine.

### PC tune-up provides peak performance of system

Optimizes operating system by clearing unused data and controlling execution application in the system.

### Safe web browsing without compromising personal data

Prevents compromise of personal sensitive data and blocks malicious Web sites for secure online activities.

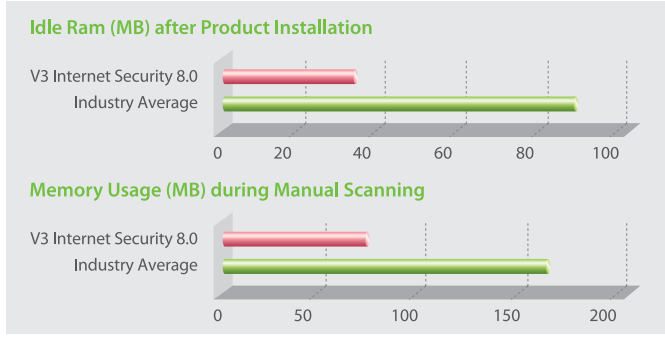

### Proactively defending networks against harmful threats

Defends networks by controlling network access of harmful users such as hackers.

## Advantages of V3 Internet Security 8.0 Benefits

V3 Internet Security 8.0 is an integrated security solution that is light and fast, with dramatically reduced resource usage (memory, CPU usage, etc).

V3 Internet Security 8.0 ensures a safe and convenient system environment, by offering security features and PC optimization functions for PC users.

- User-friendly and intuitive user interfaces
- Integrated protection solution for PC and online security
- E-mail and instant messenger live protection
- Secure deletion of sensitive data and system optimization
- Filters malicious web contents and phishing attack
